CHRISTMAS TREE

FELT AND FABRIC APPLIQUÉ TUTORIAL

Finished Size: 30 cm (H) x 24 cm (W)

Step by Step Guide
with Patterns,
Measurements
and Sewing Tips

MATERIALS

- Cotton fabric (various prints)
- Felt fabric (yellow, red, green, cream)
- Polyester fiberfill (for light padding)
- Small buttons (2 pieces)
- Thin cord or ribbon
- Embroidery thread
- Matching thread for sewing
- Fabric glue (optional)
- Scissors, pins and needle
- Sewing machine or hand sewing

TOOLS

- Fabric Scissors
- Thread
- Pins
- Hand Needle
- Fabric Glue (optional)
- Polyester Fiberfill
- Measuring Tape

Cut 2 (checked fabric)

STEP BY STEP INSTRUCTIONS

- Trace the patterns on the wrong side of the fabrics and cut all the pieces with a 0.5 cm seam allowance.
- Sew the star pieces, leaving a small opening. Turn right side out, lightly stuff and close the opening.
- Sew the top layer pieces and add decorative stitches around the edges.
- Sew the middle layer pieces and add embroidery or decorative stitches.
- Sew the candy cane pieces, turn right side out, lightly stuff and close. Add a small bow with cord.
- Make the ornaments (star and ball). Sew, stuff lightly and add a small bow or hanging cord.
- Sew the buttons in place on the lower middle layer.
- Sew the stocking pieces, turn right side out, lightly stuff and close. Add a cream top and decorative stitches.
- Arrange and sew the tree layers from top to bottom, overlapping them as shown in the main photo.
- Add the ornaments (stars, candy canes and ball) with cord or embroidery thread.
- Sew the trunk pieces, turn right side out, lightly stuff and close. Attach to the bottom of the tree.
- Hand sew the star on the top of the tree and secure all embellishments.

Christmas Tree Felt and Fabric Appliqué Tutorial Pattern

Create a beautiful, handmade Christmas decoration with this Christmas Tree Felt and Fabric Appliqué Tutorial Pattern. This cheerful holiday project combines colorful cotton fabrics, soft felt, decorative embroidery, and adorable Christmas ornaments to make a festive tree that can be displayed on a wall, door, or throughout your home.

This complete step-by-step Christmas sewing tutorial follows the design shown in the reference image. You will learn how to

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

prepare the fabric patterns, cut the individual tree layers, sew the felt ornaments, assemble the overlapping branches, and finish your decoration with beautiful hand-stitched details.

The finished Christmas tree measures approximately 30 cm tall × 24 cm wide (11.8 × 9.4 inches). This tutorial uses American sewing terminology, measurements in centimeters, and beginner-friendly techniques.

Step 1: Gather Your Materials and Sewing Tools

Before beginning your fabric Christmas tree project, prepare all the necessary materials. Having everything organized will make the sewing process easier and help you achieve a professional-looking result.

Materials

- Cotton fabric: Red, green, teal blue, cream, and red-and-white checked prints.
- Felt fabric: Yellow, red, green, and cream.
- Polyester fiberfill: For lightly stuffing the ornaments.
- Embroidery floss: White, yellow, green, and red.
- Matching sewing thread: For assembling the fabric pieces.
- Small buttons: Two green buttons for decorating the tree.
- Thin ribbon or decorative cord: For hanging ornaments and making bows.
- Fabric glue: Optional, for temporarily securing small decorations.
- Backing fabric: Green cotton or felt for the reverse side.
- Lightweight interfacing: Optional, for stabilizing the tree branches.

Tools

- Fabric scissors

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

- Hand-sewing needles
- Sewing machine (optional)
- Straight pins or sewing clips
- Measuring tape
- Fabric marking pencil
- Iron and ironing board
- Turning tool or blunt wooden stick
- Embroidery needle
- Paper and pencil for tracing patterns

Recommended seam allowance: 0.5 cm (approximately 3/16 inch), as indicated in the reference chart.

For beginners, a basic straight stitch is sufficient for most construction steps. Decorative stitches can be completed by hand.

Step 2: Understand the Christmas Tree Pattern and Measurements

The Christmas tree consists of several overlapping fabric sections that gradually increase in width from top to bottom.

The reference design features a pointed yellow star at the top, red upper branches, green and teal middle branches, colorful lower branches, and a checked rectangular trunk.

The following measurements are taken from the cutting chart. They describe the approximate dimensions of the individual pattern shapes.

Main cutting measurements

Pattern piece	Size (cm)	Quantity
----------------------	------------------	-----------------

<https://creative.craftsforlove.com/> - SEE THE BEST PATTERNS

Top layer – left 9 × 5 1

Top layer – 9 × 5 1
right

Middle layer – 9 × 5.5 1
left

Middle layer – 9 × 5.5 1
right

Lower middle – 10 × 5.5 1
left

Lower middle – 10 × 5.5 1
center

Lower middle – 10 × 5.5 1
right

Bottom layer – 10 × 5.5 1
left

Bottom layer – 10 × 5.5 1
center

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Bottom layer – right	10 × 5.5	1
Top star	5 × 5	2
Ornament star	4 × 4	2 per ornament
Ornament ball	Approximately 3 cm wide	2 per ornament
Green button ornament	Approximately 2.5 cm	2
Christmas stocking	5 × 6	2
Tree trunk	10 cm long	2
Candy cane	4 × 6	2 per cane

The chart also shows a teardrop-shaped decorative piece measuring approximately 9 × 5 cm. It can be used as an additional fabric embellishment or adapted as a decorative backing element.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Important: The diagram provides approximate pattern dimensions, but the shapes are curved rather than rectangular. Trace the illustrated outlines, not simple rectangles. For pieces that will be sewn right sides together and turned, cut a matching reverse piece as well. The chart's quantities primarily identify the visible design pieces.

The tree trunk is approximately 10 cm long in the cutting diagram; its width should be traced from the illustration.

Preparing your paper templates

Draw each pattern piece onto paper using the measurements above.

Create gentle curves along the lower edges of the branches and a pointed upper section for each piece.

The top branches should be slightly smaller and more delicate than the bottom branches.

Label each template with its name, fabric color, quantity, and seam allowance.

When drawing your templates, keep the overall tree dimensions in mind. The overlapping branches must create a balanced triangular silhouette.

Because the diagram is an illustrated guide rather than a calibrated printable template, test the paper pieces together before cutting your fabric.

Step 3: Prepare and Cut the Fabric Pieces

Place your selected cotton fabrics on a clean cutting surface.

Press the fabric with an iron to remove wrinkles. This helps ensure accurate cutting.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Arrange your fabrics according to the reference design:

- Red checked cotton: Left upper branch and tree trunk.
- Red dotted cotton: Right upper branch and selected lower branches.
- Teal blue cotton: Middle and lower branch sections.
- Green cotton: Middle and bottom branches.
- Cream printed cotton: Right lower-middle branch.
- Red heart-print cotton: Left lower-middle branch.

Tracing the patterns

Place each paper template on the wrong side of its corresponding fabric.

Trace around the template using a fabric marking pencil.

Add a 0.5 cm seam allowance if it is not already included in your paper pattern.

Cut carefully along the marked cutting lines.

For a dimensional, turned-edge finish, cut two matching fabric pieces for each branch section.

If you prefer flat appliqué, cut one visible piece for each section and finish its edges with a narrow zigzag stitch or blanket stitch.

Beginner tip: Keep all cut pieces organized in separate groups. Labeling them prevents confusion when assembling the Christmas tree.

Step 4: Sew the Yellow Felt Star ★

The large yellow star is the centerpiece at the top of your Christmas tree.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Cut two identical star shapes from yellow felt, each measuring approximately 5 × 5 cm.

Place the two felt stars together with their edges aligned.

Thread an embroidery needle with yellow or golden embroidery floss.

Begin stitching around the outside edges using a blanket stitch or small running stitches.

Leave an opening of approximately 2 cm.

Insert a small amount of polyester fiberfill into the star.

Use a blunt turning tool to gently distribute the stuffing into all five points.

Avoid overstuffing, because the star should remain relatively flat.

Close the opening with matching stitches.

For a more decorative appearance, sew a second line of tiny stitches just inside the outer edge.

Set the completed star aside until the final assembly.

Step 5: Sew the Red Top Tree Layers

The upper section of the Christmas tree consists of two red fabric branches.

One branch uses red-and-white checked fabric, while the other uses red fabric with small white dots.

Sewing the left branch

Cut two matching pieces using the 9 × 5 cm top-left template.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Place the fabric pieces right sides together.

Pin around the curved edges.

Sew around the outside using a 0.5 cm seam allowance, leaving a small opening along an edge that will later be hidden.

Clip small notches into the curved seam allowance without cutting the stitching.

Turn the piece right side out.

Gently push the curves into shape.

Press with a warm iron.

Close the opening with a ladder stitch or by machine if the edge will be concealed.

Sewing the right branch

Repeat the same process using the red dotted fabric.

Once both pieces are completed, place them side by side.

Allow the right branch to overlap the left slightly, following the reference illustration.

Add decorative embroidery around the edges using white or golden thread.

A simple running stitch approximately 0.3 cm from the edge creates a beautiful handmade appearance.

Step 6: Create the Middle Green and Blue Branches

The next section introduces the green and teal blue fabrics.

These pieces give the Christmas tree its layered, patchwork appearance.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Cut the middle-left branch from teal blue cotton and the middle-right branch from green cotton.

Each piece measures approximately 9 × 5.5 cm.

Sew each branch using the same right-sides-together method used for the upper branches.

Turn the pieces right side out and press.

Adding decorative snowflakes

The teal branch in the reference image features a white embroidered snowflake.

To recreate this decoration, use white embroidery floss.

Begin by stitching three straight lines that intersect at the center, creating six arms.

Add small diagonal stitches near the ends of the arms.

Keep the design symmetrical.

Secure the embroidery thread on the reverse side.

Repeat the snowflake design on other teal sections if desired.

Decorating the green branch

Use white, yellow, or light green embroidery floss to create small stars or snowflakes.

You can also add tiny hearts with red thread.

These embroidered details give the tree a festive, handcrafted appearance.

Sewing tip: Embroider the fabric before completing the turned-edge branch whenever possible. This hides the thread ends inside the finished piece.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Step 7: Sew the Lower Middle Tree Layers

The lower-middle section uses three colorful fabric pieces.

According to the cutting chart, each piece measures approximately 10 × 5.5 cm.

Prepare the following:

1. Left branch in red heart-print fabric.
2. Center branch in green fabric.
3. Right branch in cream printed fabric.

Cut matching backing pieces if using the turned-edge construction method.

Sew around each pair, leaving a small turning opening.

Clip curved seams, turn right side out, and press.

Close the openings with invisible hand stitches.

Attach the decorative buttons

The green center branch includes a round green button.

Position the button near the center of the branch.

Use a hand-sewing needle and matching thread to secure it firmly.

For the second button, choose a nearby green or cream branch, following the placement shown in the reference image.

Stitch through each buttonhole several times.

Knot the thread securely on the reverse side.

The buttons serve as decorative ornaments and add dimension to the finished tree.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

If the project will be accessible to young children, replace detachable buttons with embroidered circles to avoid small-part hazards.

Step 8: Make the Bottom Tree Layers

The bottom section is the widest part of the Christmas tree.

It consists of three fabric branches, each approximately 10 × 5.5 cm.

Use the following colors:

- Left branch: Green cotton.
- Center branch: Teal blue cotton.
- Right branch: Red cotton.

Trace, cut, and sew each branch using the same techniques described earlier.

After turning and pressing the pieces, add decorative running stitches around the edges.

Use white embroidery floss to create additional snowflakes on the teal blue fabric.

Add small embroidered hearts or dots to the green and red branches.

Arrange the bottom branches so they form a wide, gently curved base.

The center branch should overlap the side branches slightly to create the layered appearance.

Before attaching these pieces permanently, check that the overall tree remains approximately 24 cm wide.

Step 9: Make the Red Felt Star Ornaments ★

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

The reference design includes small red star ornaments hanging from the branches.

Cut two matching red felt stars for each ornament.

Each star measures approximately 4 × 4 cm.

Place the felt pieces together.

Use red embroidery floss to sew around the outer edges with a blanket stitch.

Leave a small opening.

Insert a little polyester fiberfill.

Close the opening with matching stitches.

Adding a hanging cord

Cut approximately 8–10 cm of thin golden cord.

Fold the cord in half to create a loop.

Secure the ends to the top of the felt star with several small stitches.

Tie a tiny decorative bow above the star if desired.

Repeat the process for the second star ornament.

The finished ornaments should be soft, lightly padded, and small enough to hang naturally from the tree branches.

Step 10: Sew the Round Christmas Ball Ornament

The red Christmas ball adds another charming detail to the design.

Cut two round pieces of red felt, approximately 3 cm wide.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Place the circles together.

Stitch around the outer edge, leaving a small opening.

Insert a small amount of polyester fiberfill.

Close the opening.

Attach a short piece of golden cord to the top.

Create a small bow with the remaining cord and sew it securely in place.

For a polished appearance, use tiny, evenly spaced stitches.

The ornament should maintain a rounded shape without becoming overly bulky.

Step 11: Create the Red and White Candy Canes 🍭

The reference tree includes two decorative candy canes.

Each candy cane measures approximately 4 cm wide × 6 cm tall, including its curved hook.

Use red-and-white striped fabric or create the stripes using narrow felt strips.

Cutting the candy cane pieces

Trace the candy cane template onto your selected fabric.

Cut two matching shapes for each candy cane.

Place them right sides together.

Sew around the edges using a narrow seam allowance, leaving an opening along a straight section.

Because the candy cane has tight curves, use short stitches and carefully clip the seam allowance.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Turn right side out using a narrow turning tool.

Add a small amount of polyester fiberfill to create a softly padded shape.

Close the opening with a ladder stitch.

Finishing the candy cane

If you are using plain red fabric, sew diagonal white felt strips across the surface to imitate peppermint candy stripes.

Attach a small golden bow near the upper curved section.

Make a second candy cane using the same process.

Set both ornaments aside.

Beginner tip: For very narrow candy canes, a flat felt appliqué construction may be easier than turning and stuffing. It will also maintain the same festive appearance.

Step 12: Sew the Miniature Christmas Stocking

The small red Christmas stocking hangs near the lower center of the tree.

Cut two matching stocking shapes from red felt, approximately 5 × 6 cm.

Place the two pieces together.

Sew around the outside edges, leaving the upper opening unstitched.

If you want a lightly padded ornament, insert a small amount of fiberfill before closing the top.

Cut a cream felt rectangle approximately 5 cm wide for the stocking cuff, adjusting its height to fit your pattern.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Fold the cream felt over the top of the stocking.

Secure it using a running stitch.

Add decorative stitches around the stocking edges with white or golden embroidery floss.

Attach a small hanging loop to the back of the cuff.

The stocking should be positioned at a slight angle when attached to the tree, matching the reference image.

Step 13: Sew the Checked Fabric Tree Trunk

The trunk is a rectangular piece made from red-and-white checked fabric.

The reference cutting pattern shows a length of approximately 10 cm.

Cut two matching rectangles using the trunk template.

Place them right sides together.

Sew around the edges, leaving a small opening.

Turn the trunk right side out.

Press carefully to create neat corners.

Add a very thin layer of polyester fiberfill if you want a padded finish.

Close the opening.

Use red embroidery thread to create a decorative running stitch around the perimeter.

The trunk will be attached to the bottom center of the Christmas tree during assembly.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Step 14: Assemble the Christmas Tree Layers

This is the most important part of the project.

Before sewing, arrange all the completed branch sections on a flat surface.

Use the reference image as your placement guide.

Prepare the backing

Cut a green fabric or felt backing large enough to support the complete tree silhouette.

For a wall hanging, lightweight interfacing can be added to the backing to prevent sagging.

Lay the backing flat with the right side facing up.

Arrange the layers

Begin by positioning the widest bottom branches.

Place the green branch on the left, teal blue in the center, and red on the right.

Overlap the neighboring edges slightly.

Position the lower-middle row above them, allowing its lower edges to cover the upper edges of the bottom row.

Arrange the red heart-print branch on the left, green branch in the center, and cream branch on the right.

Continue with the teal and green middle branches.

Finally, position the two red upper branches.

The branch tips should overlap naturally, creating a full Christmas tree shape.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Check the final shape

Step back and examine the arrangement.

Make sure the tree is balanced and the colors are evenly distributed.

Adjust the overlap until the finished shape measures approximately 30 cm tall × 24 cm wide, including the top star and trunk.

The exact overlap will depend on the shape of your traced templates.

Sew the branches in place

Pin or baste the layers onto the backing.

Starting with the bottom row, secure the branches using small hand stitches or a sewing machine.

Work upward, stitching each new row in place.

Whenever possible, sew along the upper edges or underneath overlapping sections so the attachment stitches remain hidden.

Leave the decorative lower edges free where appropriate. This creates the soft, layered appearance shown in the reference design.

Trim the backing neatly to follow the finished tree silhouette, or finish the backing edges before assembly.

Step 15: Attach the Christmas Ornaments

Once the tree layers are secure, begin arranging the decorative ornaments.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Place the red felt stars near the upper-right and lower-left branches.

Position the red Christmas ball on the left side of the tree.

Attach one candy cane near the upper-left branches and another near the right side.

Place the miniature stocking near the lower center.

Securing the decorations

Use small hand stitches to attach each ornament.

For hanging ornaments, stitch the decorative cord directly to the fabric branches.

For ornaments without loops, sew through the back of the felt and into the tree fabric.

Avoid pulling the thread too tightly, as this may distort the branches.

If desired, use a tiny amount of fabric glue to hold the ornaments temporarily while sewing.

For a durable Christmas decoration, stitching is recommended as the primary attachment method.

Step 16: Attach the Trunk and Top Star

Position the checked fabric trunk at the bottom center of the tree.

The trunk should extend slightly below the lowest branches.

Use matching thread to sew the upper part of the trunk securely to the backing.

Keep the stitches small and discreet.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Next, place the yellow felt star at the top of the Christmas tree.

Center the star directly above the two red upper branches.

Allow the bottom point of the star to overlap the upper branches slightly.

Sew the star in place using small hand stitches around its lower points.

For extra stability, add a few hidden stitches through the center of the star.

The tree now has its complete Christmas silhouette.

Step 17: Add the Final Decorative Embroidery ✨

The reference design uses decorative stitching to give the tree a detailed, handmade finish.

This step is optional, but it greatly enhances the finished appearance.

Running stitch

The running stitch creates a simple dashed line.

Bring the needle up through the fabric, insert it a short distance away, and repeat.

Use this stitch around the branch edges and trunk.

Blanket stitch

The blanket stitch is ideal for felt ornaments.

It creates a neat decorative edge while holding two felt pieces together.

Keep the stitches evenly spaced for a consistent finish.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Backstitch

Backstitch creates a continuous line.

Use it for embroidered outlines, small hearts, and decorative details.

French knots

French knots can imitate tiny berries, snowflakes, or festive dots.

Wrap the embroidery floss around the needle once or twice, then insert the needle close to the original entry point.

Pull the thread through carefully to form a small knot.

Snowflake embroidery

Use white embroidery floss to stitch snowflakes on the teal blue branches.

Create intersecting straight lines and add small diagonal branches.

Vary the snowflake sizes slightly for a natural appearance.

Final inspection

Examine the entire Christmas tree.

Trim loose threads.

Check that every ornament is securely attached.

Adjust any uneven branches.

Lightly press the tree from the reverse side using a pressing cloth, avoiding direct pressure on padded ornaments and buttons.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Step 18: Finish the Back of the Christmas Tree

The reference chart includes both front and back views.

The front features colorful patchwork fabrics and festive ornaments.

The back shows a simple green Christmas tree silhouette with layered branches.

To recreate this appearance, use green fabric or felt for the reverse side.

If the backing was already attached during assembly, finish any exposed edges neatly with hand stitches.

If you are adding a separate back layer, trace the completed tree silhouette onto green fabric, cut it with a suitable edge allowance, and stitch it to the reverse side without catching the hanging ornaments.

For a wall decoration, attach a ribbon loop near the top of the backing.

Secure the ribbon with several reinforced stitches.

Make sure the hanging loop is centered so the Christmas tree hangs straight.

Step 19: Display Your Handmade Christmas Tree 🎄

Your Christmas Tree Felt and Fabric Appliqué is now complete!

This decorative project can be used in several creative ways.

Hang it on a wall as part of your Christmas decorations.

Attach it to an interior door for a cheerful seasonal accent.

Use it as a decorative element in a sewing room or craft corner.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

It can also be made as a thoughtful handmade Christmas gift for friends and family.

For a coordinated holiday collection, use the same fabrics to create matching stockings, ornaments, table decorations, or fabric gift bags.

If you want to make a larger version, enlarge every pattern piece by the same percentage and increase the backing accordingly.

Step 20: Helpful Sewing Tips for Beginners

Choose easy-to-sew fabrics. Quilting cotton and craft felt are excellent materials for beginners because they are easy to cut and handle.

Maintain consistent seam allowances. Using a 0.5 cm seam allowance helps the individual pieces fit together more accurately.

Avoid excessive stuffing. The ornaments should be softly padded rather than firm or bulky.

Press after sewing. Pressing each fabric piece improves the shape and creates a cleaner finish.

Use matching thread. Matching thread blends into the fabric, while contrasting embroidery floss highlights decorative details.

Check the layout before stitching. Arrange every branch and ornament before permanently attaching anything.

Work slowly around curves. Short machine stitches or careful hand stitches help maintain smooth, rounded branch edges.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

Secure all embellishments. Buttons, cords, and ornaments should be firmly stitched, especially if the decoration will be stored and reused every Christmas.

Finished Christmas Tree Pattern: Final Project Checklist

Your sewing progress

0 of 9 completed

All fabric branches have been cut and sewn.

The yellow felt star is complete.

The red felt stars and Christmas ball are stuffed and stitched.

Both candy canes and the miniature stocking are finished.

Decorative buttons and snowflake embroidery are attached.

The tree branches are assembled in overlapping rows.

The checked fabric trunk is attached.

The backing and hanging loop are secure.

Loose threads have been trimmed and the final shape checked.

Conclusion: Enjoy Your Handmade Fabric Christmas Tree

The Christmas Tree Felt and Fabric Appliqué Tutorial Pattern is a wonderful project for anyone who enjoys sewing, quilting cotton, felt crafts, and handmade holiday decorations.

By following these detailed instructions, you can transform simple pieces of colorful fabric into a beautiful layered Christmas tree featuring embroidered snowflakes, padded felt stars, candy canes, buttons, a miniature stocking, and a charming checked fabric trunk.

<https://creative.craftsforlove.com/> - **SEE THE BEST PATTERNS**

The combination of fabric appliqué, hand embroidery, decorative stitching, and simple sewing techniques makes this project suitable for beginners while still offering creative possibilities for experienced crafters.

With a finished size of approximately 30 × 24 cm, this Christmas tree is a lovely addition to your seasonal decorations and a meaningful handmade gift.

Most importantly, you can personalize the project with your favorite Christmas fabrics, embroidery colors, and ornaments while preserving the original design.

Happy sewing, and Merry Christmas! 🌲 🧵 ❤️
